**(54) ELECTRONIC APPARATUS ON VEHICLE**

**(57) Abstract:**

**PROBLEM TO BE SOLVED:** To provide an electronic apparatus on vehicle which improves the visibility and the operability of an operation part or a record medium insertion part placed on the lower stage side of a monitor taking a rise attitude.

**SOLUTION:** A monitor (display device) M which is pulled out from an enclosure 12 and takes a rise attitude is moved back toward the enclosure 12 and is approximated to it or an operation part 14 having an operation panel P is pulled by the same extent of the monitor M or more to expose the operation panel P, and then, a driver or the like can easily see the operation panel, thus improving the visibility and the operability more than conventional. Further, moving-back of the monitor M and pulling-out of the operation part 14 are simultaneously performed to more improve the visibility and the operability of the operation panel P, and a margin is obtained with respect to space.
